Name: $\qquad$ Date: $\qquad$

1. Complete the table to show the name, number of sides, and number of corners for each shape. Here are the shape names you can use:

| pentagon | quadrilateral | hexagon | triangle |
| :---: | :---: | :---: | :---: |
|  | Shape Name | Number of <br> Sides | Number of <br> Corners |
| triangle | 3 | 3 |  |
|  | quadrilateral | 4 | 4 |

2. Look at the shapes below. Circle each triangle and put an $X$ on each quadrilateral.
